General information about Cu terminals.....	2
Tube terminals 0.75 - 10 mm ²	4
KRF tube terminals 16 - 800 mm ²	5
KRF tube terminals with two holes 16 - 400 mm ²	6
KRFS tube terminals with narrow palm 50 - 400 mm ²	7
KRF angled terminals 45° 10 - 150 mm ²	8
KRF angled terminals 90° 10 - 150 mm ²	9
KRT tube terminals 10 - 500 mm ²	10
KRD tube terminals 16 - 1000 mm ²	11
KRD tube terminals 16 - 1000 mm ²	12
DIN 46235 tube terminals 6 - 1000 mm ²	13
DIN 46234 sheet metal terminals 10 - 185 mm ²	14
KS/KSF through connectors 0.75 - 800 mm ²	15
KS/KSF through connectors with partition 10-500 mm ²	16
KST through connectors with partition 10-500 mm ²	17
KSD through connectors with partition 16-1000 mm ²	18
KSxP parallel connectors for conductors total 0.5 - 6.75 mm ²	18
KSxP parallel connectors for conductors total 10 - 630 mm ²	19
CUT through connectors for single strand conductors 6 - 16 mm ²	19
DIN 46230 pin terminals 10 - 95 mm ²	20
KRX tube terminals for Excel and Fxcel cable 10 - 16 mm ²	20
KSX through connectors for Excel and Fxcel cable 10 - 16 mm ²	20
C-sleeves 6 - 300 mm ²	21

General information about Cu terminals

System Elpress

System Elpress consists of terminals and tools that are designed and tested together to give a certified crimping result. This ensures that users will feel confident when using our systems, and that a secure connection is achieved through the proper handling of our products. By using Elpress Cu-connection elements together with one of Elpress crimp systems one obtains a connection that has been tested according to the requirements of IEC 61238:1.

Cu terminals

Elpress copper connectors are made of pure copper 99.95%. We manufacture tube terminals type KR/KRF/KRD/KRT, through connectors type KS/KSF/KSD/KST for stranded conductors, IEC 60228 class 2, and multi-stranded conductors IEC 60228 class 5 such as C-sleeves primarily pre-splicing of Cu-lines and many customised products. For flexible and stranded Cu conductors, terminals of type KR/KRF and through connectors of type KS/KSF are used. Terminals type KRD/KRT and through connectors type KSD/KST are normally used for stranded Cu conductors from and including 500 mm². Terminals of type KR/KRF/KRD/KRT are used mainly in termination to bus bars and apparatus of copper, while through connectors, of type KS/KSF/KSD/KST, are used mainly in the splicing of copper conductors in cable assemblies. They can also be used for straight splicing of earth conductors. With a branching sleeve, type C, one splices and branches earth conductors, lightning conductor installations and the like.

UL-approved terminals

KR/KS, KRF/KSF, KRFS, KRFN, KRT/KST
UL approved in accordance with file no. E205350.

DNV-approved terminals

Elpress KR/KS, KRF/KSF and KRT/KST terminals meet DNV's rules for classification of ships and Det Norske Veritas' Offshore Standards. The terminals are approved for installations on ships and mobile "offshore" units.

Number of crimps

Normally one crimp is required up to and including 150 mm² and two or three crimps for larger areas. Note, however, that another number of crimps may be needed in some cases, see tables for tool dies. If possible, crimps should be placed next to each other with a couple of mm spacing between each one. Overlap is sometimes inevitable.

Crimp sequence for two crimps.

Crimp sequence for three crimps.

Marking of Cu terminals

Elpress marking system for copper terminals shows logotype, cable area and type number for hexagonal die. This system allows checks that the correct tools have been used when contact crimping because the die number automatically becomes embossed during the contact crimping.

Marking tube terminals

25 (on neck)
Type No. for hexagonal die (Elpress logo) 150 12 F (on the palm)
150 = Cu conductor in mm²
12 = Hole size
F = KRF

Marking through connectors

Elpress Logo
Type No. for hexagonal die 16 F (possible screened conductor area and earthing sign)
16 = Cu conductor in mm²
F = KSF

Marking C-sleeves (example C70-95)

Area marking (side 1)
25-120 / 140-190
min - max (mm² per conductor) / min - max (total mm² in the sleeve)
Elpress logo, Die number (side 2)
BCx, "x" corresponds to die number

Clearance for holes in terminal palm

Screw size	Hole diameter (Ø mm)
M3	3,2
M4	4,3
M5	5,3
M6	6,4
M8	8,4
M10	10,5
M12	13
M16	17
M20	21
M24	26

Screw and washer

The following apply for bright galvanized type nuts and screws, with strength class 8.8, used for connecting terminals with Cu and Al palms:

- Always use a torque wrench to be certain the right torque is achieved. Make sure it is calibrated at regular intervals according to the supplier's instructions.
- Use the recommended torque according to the screw manufacturer's instructions.
- Always use a hard plain washer to reduce friction against the connection surface and the edge pressure, hardness min HB200.
- Install as illustrated.

Customised products

Customised products are an important part of our work. Solving problems for the customer and at the same time manufacturing the products with profitability is a special challenge. This way, we also increase our knowledge of the customers' needs. The above terminals include different models of T-connectors where you can connect three conductors of the same size using only one terminal. These are used, for example, in transformer manufacturing. Other connections in transformer manufacturing are lead-in pins and special terminals for switches. In conclusion, all terminals are designed to easily ensure a high-quality connection even in advanced applications.

Tube terminals 0.75 - 10 mm²

- Material: Cu 99.95%, tin plated Cu/Sn.
- For multi-stranded (class 5) and stranded (class 2) Cu conductors.
- UL approved (1.5 - 10 mm²).

Examples of palm marking KR: 10 10

10 = mm² 10 = Palm hole for M10

t = palm thickness, s = strip length

KRF tube terminals 16 - 800 mm²

- Material: Cu 99.95%, tin plated Cu/Sn.
- Inspection hole
- For stranded (class 2) and multi-stranded (class 5) Cu conductors
- For multi-stranded Cu conductors Elpress recommends the DUAL system.
- UL approved (KRF16-500 mm²), DNV approved (16-400 mm²).

Example of marking KRF: 17 (neck) Elpress logotype 70 10F (palm)

17 = Die No. 70 = mm² 10 = palm hole for M10 F = type KRF for stranded and flexible conductors.

t = palm thickness, s = strip length

KRF tube terminals with two holes 16 - 400 mm²

- Material: Cu 99.95%, tin plated Cu/Sn.
- Inspection hole
- For stranded (class 2) and multi-stranded (class 5) Cu conductors.
- For multi-stranded Cu conductors Elpress recommends the DUAL system.
- UL approved (16-400 mm²), DNV approved (see note).

Example of marking KRF: 17 (neck) Elpress logotype 70 10F (palm)

17 = Die No. 70 = mm² 10 = palm hole for M10 F = type KRF for stranded and flexible conductors.

t = palm thickness, s = strip length

KRFS tube terminals with narrow palm 50 - 400 mm²

- Material: Cu 99.95%, tin plated Cu/Sn.
- Inspection hole
- For stranded (class 2) and multi-stranded (class 5) Cu conductors.
- For multi-stranded Cu conductors Elpress recommends the DUAL system.
- Easy to install via cable gland, allows for pre-installation.
- The width of the palm is less than or as wide as the neck.
- UL-approved, DNV approved.

Example of marking KRFS: 17 (neck) Elpress logotype 70 10F (palm)

17 = Die no. 70 = mm² 10 = palm hole for M10 F = type KRF for stranded and flexible conductors.

t = palm thickness, s = strip length, SB = short barrel

04

KRT tube terminals 10 - 500 mm²

- Material: Cu 99.95%, tin plated Cu/Sn.
- Inspection hole.
- For stranded (class 2) Cu conductors.
- UL approved (10-500 mm²), DNV approved (10-400 mm²).

Example of marking KRT: 16 (neck) Elpress logotype 70 10 (palm)
16 = Die No. 70 = mm² 10 = palm hole for M10

t = palm thickness, s = strip length

KRD tube terminals 16 - 1000 mm²

- Material: Cu 99.95%, tin plated Cu/Sn.
- Inspection hole.
- For stranded (class 2) Cu conductors.

Example of marking KRD:
14 (neck) Elpress logotype
70 10 (palm)
 14 = Die No. 70 = mm²
 10 = palm hole for M10

t = palm thickness, s = strip length

DIN 46235 tube terminals 6 - 1000 mm²

- Din tube terminals for Cu conductors.
- Material: Cu 99.95%, tin plated Cu/Sn.
- Dimensions according to DIN 46235, the number of crimps is indicated on the neck of the terminal.
- For crimping DIN 46235 terminals, use dies according to DIN 48083.

Example of plate marking: 95 1095 = mm² 10 = palm hole for M10

KS/KSF through connectors 0.75 - 800 mm²

- Material: Cu 99.95%, tin plated Cu/Sn.
- Inspection hole and int. cable stop.
- For stranded (class 2) and multi-stranded (class 5) Cu conductors.
- For multi-stranded Cu conductors Elpress recommends the DUAL system.
- UL approved (1-500 mm²). DNV approved (16-400 mm²).

Examples of marking: 20 95F (Elpress logotype is included on the marking.)

20 = Die No. 95 = mm² F = type KSF for stranded and flexible conductors 111 = screen mm²

KSD through connectors with partition 16-1000 mm²

- Material: Cu 99.95%, tin plated Cu/Sn.
- For stranded (class 2) Cu conductors.
- Cable inspection hole and cable stop.
- UL approved (1-500 mm²). DNV approved (16-400 mm²).

Examples of marking: 16 95 (Elpress logotype is included on the marking.)
16 = Die No. 95 = mm²

s = strip length

The Elpress logo is included on the marking. Two plus two crimps are carried out with the V600, V611, PVX611 or T2600 system, crimp die TB7-20.

C-sleeves 6 - 300 mm²

- Material: Cu 99.95%. Tin plated sleeves (except C95-120, C150-185, C240-300 and C23 which are not tin plated).
- For splicing and branching earth lines and other types of equipotential bonding applications. In some cases, 2 or 3 crimps are required.
- Unique patented solution based on previously patented solution for the C25-50 branching sleeve (formerly known as C89).
- Possible to front feed all branches.
